Purwokerto, Jawa Tengah

I am a highly motivated and results-driven professional with hands-on experience in full-stack development, specializing in front-end technologies like ReactJS and NextJS. Currently working as a Data Analyst at PT. Telkom Akses, I have developed expertise in server optimization, database management, and web application development. I have successfully utilized technologies such as SQL, Tableau, and modern JavaScript frameworks to improve systems and deliver impactful solutions. With certifications in Frontend React, I am eager to bring my technical skills and problem-solving abilities to a Full Stack Developer position, contributing to innovative and scalable web applications.

Work Experiences

Telkom Akses - Yogyakarta, Central Java   May 2025 - Present
Data Management Staff

- Developing 2 dashboards for users using Tableau
- Handling data requests from users across Indonesia
- Maintaining tables from various databases using Task Scheduler and SAP Logon

Gikslab Indonesia - Bandung, West Java   Jul 2023 - Sep 2023
Frontend Developer Internship

- Developing a company dashboard using ReactJS, including adding notification settings, revamping the Task Detail design, improving Task Detail functionality, making the Kanban board responsive, and implementing the Task pop-up function
- Developing a company profile website using NextJS, including adding a responsive design to the homepage.

Education Level

Universitas Telkom - Bandung, West Java   Sep 2020 - Nov 2024
Bachelor of Informatics, 3.54/4.00

- Head of Logistics for Telkom Edutainment 2021 - Responsible for planning, coordinating, and distributing event logistics needs, including equipment procurement and logistics team management to ensure activities run smoothly and on time.
- Thesis/Final Project - Designing a Sundanese script learning application based on Flutter with Firebase as the backend.

Organisational Experience

Telkom Edutainment   Aug 2021 - Feb 2022
Logistics Chair

- Directing staff to procure facility needs
- Providing live streaming on YouTube
- Finding the right vendor to implement webinars

Certifications, Skills & Projects

- **Soft Skills**: Time Management, Teamwork & Collaboration, Communication, Problem Solving
- **Hard Skills**: HTML, CSS, Javascript, React, Node.js, Next.js, Flutter, MySQL, PostgreSQL, Firebase, Vercel
- **React and Back-end Developer** ✓ (2025)
- **Hak Kekayaan Intelektual (Aplikasi Pembelajaran AKSUN)** ✓ (2024)
- **Jagasehat** ✓ (2025): As a Front-end Developer in the Dicoding Bootcamp Batch 6 capstone project, I developed the JagaSehat telemedicine application using React and Vite, including the login page, registration page, admin dashboard, doctor list, and ideal weight check feature. I focused on implementing the mockup design into an interactive and responsive UI, while ensuring that the API integration ran optimally to support user and doctor authentication and data management.
- **aboutreza** ✓ (2025): I built the portfolio aboutreza.vercel.app as a professional platform to showcase my identity as a Front-end Developer, including my experience, certifications, and featured projects. This portfolio is designed with responsive design and intuitive navigation to emphasize my technical expertise, UI/UX, and readiness to contribute to new projects.
- **Aplikasi Pembelajaran AKSUN** ✓ (2024): I designed the Sundanese Script Learning Application as part of my final project/thesis. This application was built using Flutter to provide an interactive and user-friendly interface, and leverages Firebase as the database for storing and managing user information. Through this application, users can learn the Sundanese script practically via mobile devices with features that support a step-by-step learning process.
